

OUR MISSION

At Physicians Preference Pharmacy, we believe that the quality of compounded medications directly affects the way patients feel and respond to those medications. We understand that patients' response to their therapy is a direct reflection of the quality of the medications they are taking and that their pharmacy should specialize in those compounded medications, while delivering extraordinary hospitality and guest service.

We have implemented some of the strictest quality standards in compounding, exceeding what is required. Physicians Preference Pharmacy was one of the first pharmacies in the nation to receive Pharmacy Compounding Accreditation Board (PCAB) accreditation in 2007 and has remained certified ever since. PCAB accreditation is the benchmark of quality in the industry, as its standards exceed those of most State Boards of Pharmacy.

Because of our commitment to complete health and wellness, our compounded preparations are free of lactose, parabens, artificial sweeteners, and any unnecessary dyes, binders, and fillers.

FOR PROVIDERS

You may call or fax prescriptions directly to:

Tel: 281.828.9088

Fax: 281.828.9669 (escribe accepted)
