

Dear Friend,

You may be aware that as part of the Make America Healthy Again (MAHA) agenda, the U.S. Department of Health and Human Services and the Food and Drug Administration (FDA) announced in April 2025 a bold initiative to phase out petroleum-based food dyes (certified color additives) from the American food and medication supply.

Around the same time, the FDA revoked the authorization for FD&C Red No. 3 and is working closely with industry partners to eliminate six remaining certified color additives frequently used in foods and medicines—FD&C Green No. 3, Red No. 40, Yellow No. 5, Yellow No. 6, Blue No. 1, and Blue No. 2—by the end of 2027.

We stand behind the MAHA initiative and are excited to announce that Physicians Preference Pharmacy has begun the transition to natural dye capsules well ahead of the 2027 deadline. It is important to us and to your health that you receive the cleanest compounded preparations. Because of this commitment, our compounded preparations are free of lactose, parabens, artificial sweeteners, and any unnecessary dyes, binders, and fillers.

You will be receiving a Capsule Color Chart with your prescription order that shows the new colors and natural sources of our compounded preparations. Should you have any questions, please don't hesitate to contact one of our pharmacists at 281-828-9088.

As always, thank you for the privilege of serving you.

Sincerely,

A handwritten signature in black ink that reads "Kimberly Bennett, RPh.".
